

DAGI MOSES

29 Abayomi street, Akoka, Lagos state • +234 8181304896 • dagitmoses@gmail.com

Software Developer with extensive experience in full-stack development and web search evaluation, specializing in Flutter and Node.js , with hands-on experience in all levels of mobile and web development including design, development and deployment. Additionally, I have a background in the telecommunications sector, adding valuable insights and expertise to my skill set. Recognized for a collaborative approach, excellent communication, and teamwork skills, with a track record of delivering high-quality work and showcasing a deep understanding of programming, web evaluation and networking.

Experience

MAY 2024 – DATE

Junior Flutter Developer | Punch Nigeria Limited

- Developed and currently managing the company's anniversary site.
- Migrated the old system from a crashed site to a new, fully functional platform using Node.js and MongoDB.
- Designed and built the new system from the ground up using Flutter for the frontend and integrated it with the existing company infrastructure.
- Deployed the system on the company's LAN for internal access and use.
- Continuously providing updates and maintenance to ensure smooth operation and user experience.

JAN 2024 – AUG 2024

Personalized Internet Assesor | Telus International AI Data Solutions

- In my role, I analyze search engine results, advertisements, and web page content based on specific guidelines to assess their relevance and accuracy.
- As a Personalized Internet Assessor, I assess the quality of web pages based on predefined criteria, ensuring that users are presented with relevant, trustworthy, and high-quality content. My evaluations help search engines deliver more accurate and beneficial results to users, contributing to an enhanced browsing experience. Through my detailed analysis and adherence to evaluation guidelines, I play a crucial role in maintaining the integrity and usefulness of search engine results.

- I also evaluate the extent to which search engine results meet the needs of users based on their search queries. I assess and ensure that search engines deliver results that align with user intent, thereby enhancing user satisfaction and the effectiveness of search engine algorithms.

NOV 2023 – DATE

Inventory Officer/Consultant | Cush Consult

- My role as an Inventory Officer/Consultant, Primary entails stock counting and documentation using several inventory tool like Excel. my role requires strong analytical skills, attention to detail, and the ability to communicate effectively with stakeholders at all levels. I am committed to ensuring the accuracy and integrity of inventory data, and continuously seek ways to improve inventory management practices to drive operational excellence.

SEP 2021 – OCT 2022

Internet Service Provider Intern | Kkon Technologies

- In this role, I contributed to network planning and design by working closely with the engineering team. I helped translate conceptual network requirements into scalable designs, analyzing network capacity, coverage areas, and future expansion needs. This involved selecting hardware, defining routing protocols, and optimizing network performance, resilience, and adaptability.
- I undertook the responsibility of conducting site surveys and measurements for upcoming fiber optic and radio network installations. This involved assessing physical locations, identifying potential challenges, and measuring parameters essential for the successful deployment of network infrastructure.
- I actively participated in the deployment and installation of fiber optic and Radio network, This included executing cable installations, termination, configuration of radio equipment, antenna installations, and the establishment of reliable radio network connections.
- A crucial component of my internship involved actively participating in network troubleshooting activities. developing and applying diagnostic skills to identify and resolve issues promptly, ensuring minimal downtime for clients and continuous improvement of network reliability and performance.
- I also contributed to the implementation and maintenance of Local Area Networks (LAN). Which entails configuring network devices, managing connectivity, and ensuring seamless communication within confined geographical areas. My involvement in LAN projects enhanced my skills in network design and administration, providing a practical foundation for creating efficient and scalable local network environments.

MAR 2020 – FEB 2021

Front Desk Officer | Geoplex

- In my role as a Front Desk Officer at Geoplex, I honed my customer service skills by serving as the first point of contact for clients, visitors, and employees. I developed a warm and professional demeanor, ensuring a welcoming environment while addressing inquiries, providing information, and efficiently directing individuals to their destinations. This experience allowed me to handle a diverse range of queries and situations with tact, empathy, and a solutions-oriented approach.
- Communication was at the core of my responsibilities, managing incoming calls, emails, and in-person inquiries, ensuring prompt and accurate responses.
- Utilizing various office technologies was integral to my role. I became proficient in various office softwares, and handled basic troubleshooting for technical issues, ensuring efficient front desk operations.

Skills
